

A Tanzanian company that manufactures optical splitters

Overview

With over 20 years of experience, we take pride in delivering high-quality optical frames, accessories, workshop machinery, and ophthalmic consumables that adhere to the highest standards of excellence.

Key Takeaways

Currently, there are no Tanzanian companies explicitly listed as manufacturers of fiber optic splitters.

Raddy

Fiber Manufacturing Tanzania LT

D, based in Mwanambaya near Dar-es-Salaam, is a leading local producer of fiber optic cables and related accessories, serving telecommunications, industrial, and commercial sectors across East and Central Africa, but it does not specifically list optical splitters among its products. Karlicor Fiber provides fiber optic network installation, cabling, and splicing services, but again, it focuses on network deployment rather than manufacturing splitters. Fiber optic splitters are essential passive components in fiber networks, used to divide a single optical signal into multiple outputs.

They come in fused type and PLC type, with different packaging and connector options, and are widely used in telecommunications and data networks. For Tanzanian users seeking splitters, the practical approach is to source them from international suppliers or distributors while relying on local companies like RaddyFiber or Karlicor Fiber for cables, installation, and network integration. Global directories confirm that no splitter manufacturers are currently registered in Tanzania, so importing may be necessary for these components.

In summary, while Tanzania has reputable fiber optic cable manufacturers and service providers, local production of optical splitters is not currently available, and users typically rely on imported splitters integrated into locally installed networks.
