Key Takeaways

The price of Brazilian galvanized cable trays typically ranges from \$2 to \$25 per meter, depending on material, type, size, and finish.

Price Range and Cost Factors

Brazilian galvanized cable trays are generally made from hot-dip galvanized steel, which provides excellent corrosion resistance and durability for outdoor or rainproof applications. The average price per meter ranges from \$2 to \$25, influenced by:

- Material: Galvanized steel is standard; stainless steel or aluminum options cost more.
- Tray type: Ladder trays are more expensive than perforated or wire mesh trays, which are lighter and easier to install.

Size and thickness: Larger or thicker trays designed for heavy loads increase the price. Coating and finish: Hot-dip galvanization (HDG) offers superior corrosion protection but is pricier than pre-galvanized steel. Order quantity: Bulk purchases can reduce the per-meter cost significantly.

Shipping and installation: Heavier trays and remote locations may add to the total cost.

Suppliers in Brazil

Several reputable manufacturers and suppliers provide galvanized cable trays in Brazil, including Jeetmull Jaichandlall (P) Ltd. and Brilltech Engineers, offering a variety of sizes, shapes, and configurations suitable for construction, industrial, and electrical projects. These suppliers often provide customized solutions and export options for international buyers.

Practical Considerations

When selecting a rainproof cable tray, consider: **Durability:** Hot-dip galvanized trays resist rust and wear, ideal for outdoor or humid environments. **Ventilation:** Perforated designs allow airflow, preventing cable overheating. **Ease of installation:** Modular trays reduce labor costs and installation time.

Compliance: Ensure trays meet local electrical and safety standards. For precise pricing, it is recommended to contact suppliers directly to request a quote based on your project specifications, quantity, and delivery location in Brazil.
