Construction Price of Ladder-Type Cable Trays

Overview

Cable Tray Price List The cable tray price list are for hot dip galvanized ladder type cable tray. The price is based on standard length of the cable tray.

Key Takeaways

The cost of ladder-type cable tray installation typically ranges from $5 to $30 per meter for materials, with additional labor and installation costs depending on site conditions and complexity.

Material Costs

Ladder cable trays are available in various materials, each affecting the price: Steel (galvanized or hot-dip): $5–$25 per meter, widely used for general-purpose installations due to strength and affordability. Aluminum: $6–$30 per meter, lightweight and corrosion-resistant, ideal for outdoor or industrial environments.

FR

P (Fiberglass Reinforced Plastic): $10–$50 per meter, used in highly corrosive or chemical environments. The open ladder design reduces material usage compared to solid-bottom trays, making it more economical for large-scale installations.

Installation Costs

Installation costs vary based on labor rates, site conditions, and complexity: Labor: Skilled electricians or technicians are required, and wages vary by region. Site factors: Height of installation, accessibility, and routing complexity can increase costs. Fittings and accessories: Elbows, tees, and supports are priced per unit and add to the total cost.

Equipment and energy: Cutting, welding, and surface finishing may contribute to installation expenses. Typical installation involves reviewing approved shop drawings, preparing materials, verifying quality, and mounting trays with proper supports and spacing.

Cost Summary

For a standard ladder tray installation: Material: $5–$30 per meter depending on material and coating. Labor and installation: Can add $10–$20 per meter or more depending on complexity and location. Total estimated cost: Approximately $15–$50 per meter for a complete ladder tray installation, including materials, fittings, and labor.

Additional Considerations

Bulk orders may reduce material costs. Corrosion-resistant coatings (HDG, powder coating) increase upfront costs but improve longevity. Ladder trays allow easy cable access and ventilation, reducing long-term maintenance costs.

This estimate provides a practical range for budgeting ladder-type cable tray installations in commercial, industrial, or residential projects.
