

Fiber optic sensor parameters are misadjusted

Overview

To address the challenges of parameter decoupling and low demodulation accuracy in fibre-optic interferometric dual-parameter sensors, we proposes an innovative method co...

Article Content

Intelligent compensation method for measurement errors in optical

We chose the state parameters collected by the self-detection module of the fiber optic current sensor as input parameters to predict the ratio difference of the measured current under

A Review of Multiparameter Fiber-Optic Distributed Sensing ...

Abstract This review summarizes recent progress and emerging trends in multiparameter optical fiber sensing, emphasizing techniques that enable the simultaneous measurement of

High Precision Decoupling and Demodulation for Temperature-Strain ...

To address the challenges of parameter decoupling and low demodulation accuracy in fibre-optic interferometric dual-parameter sensors, we proposes an innovative method co...

Troubleshooting Optical Fiber Sensors in the Field

In this article, we will discuss some common methods and tips to troubleshoot optical fiber sensors in the field. Find expert answers in this collaborative article
