High-density data center PDU42U available now

Overview

With its universal input, dynamic C39 outlets and global approval, Eaton's universal input rack PDU G4 (UPDU) is a single solution equipped to meet the most diverse data center rack power needs. Industry-leading, high-density design fits 24 or 42 evenly distributed outlets on a 42U chassis. Evolving its EcoStruxure™ Data Center Solutions portfolio. HPE G2 Enterprise Series Racks offer innovative physical security, structural integrity, cooling and cable management features and a wide choice of power and switching options to match your high-density IT requirements today and in the future. G2 Enterprise Series Racks have a 10-year limited. 42U PDUs come in many configurations. They execute different functions and serve diverse clientele. Up to 42 C13's in a 42U high by 1U wide device. Additional features include high native cord retention that eliminates the need for custom and costly ancillary locking cord devices. STILL HAVE QUESTIONS?
