

How much does fireproof cable tray cost in Africa

Overview

Price List Cable Tray 2024 - Free download as PDF File (.pdf), Text File (.txt) or view presentation slides online.

Key Takeaways

Fire-resistant cable trays in Africa typically range from \$50 to \$250 per meter, depending on material, size, and supplier.

Cost Factors

The price of fire-resistant cable trays varies significantly based on several factors: Material: Common materials include galvanized steel, aluminum, stainless steel, and glass fiber reinforced plastic (GRP).

GRP or FR

P trays, which are flame-retardant, tend to be more expensive due to their fire-resistant properties and durability. Tray Type: Ladder trays, solid bottom trays, and ventilated trays differ in cost. Ladder trays are often slightly cheaper than solid bottom trays, but fire-rated versions add to the price.

Size and Dimensions: Width, depth, and thickness affect pricing. Standard widths range from 50mm to 600mm, and thicknesses from 0.6mm to 3.

0mm for metallic trays. Supplier and Location: Prices vary across African countries. For example, suppliers in Ghana and South Africa offer wholesale and retail options, with additional costs for shipping and installation.

Additional Components: Supports, connectors, and clamps for fire-rated trays can increase the overall cost.

Price Estimates

Metallic fire-resistant trays: Approximately \$50–\$150 per meter, depending on steel grade and coating. GRP/FRP fire-resistant trays: Typically \$120–\$250 per meter, reflecting the higher cost of flame-retardant composite materials. Installation and shipping: Can add 10–30% to the base material cost, especially for large projects or remote locations.

Recommendations

Request quotes from multiple suppliers: Prices vary by country and supplier, so obtaining local quotes ensures accurate budgeting. Consider bulk orders: Larger quantities often reduce per-meter costs. Check certifications: Ensure the trays meet fire-resistance standards relevant to your country or project.

Factor in installation: Fire-resistant trays may require specialized supports or connectors, which can affect total project cost. In summary, while fire-resistant cable trays in Africa generally cost between \$50 and \$250 per meter, the final price depends on material, tray type, size, supplier, and installation requirements.
