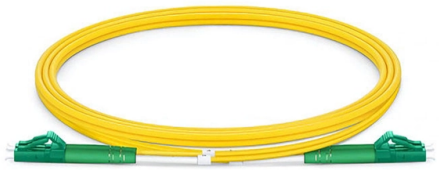
How much does fireproof stainless steel cable tray cost



Overview

Cable Tray Price Per Meter: Market Analysis & Cost Cable tray pricing depends on materials, coatings, size, supplier margins, and order quantity —plus hidd.

Key Takeaways

Fireproof stainless steel cable trays typically range from £50 to £200 per 3-meter section, depending on size, grade, and fireproofing features.

Overview

Fireproof stainless steel cable trays are designed to support and protect electrical cables while providing fire resistance through intumescent materials or reinforced fireproof coatings. They are commonly used in industrial, commercial, and critical infrastructure applications, including oil, gas, petrochemical, rail, marine, and nuclear facilities. Standard stainless steel grades used are 304 and 316, offering excellent corrosion resistance and durability.

Price Factors

The cost of fireproof stainless steel cable trays depends on several factors: Material Grade: 316 stainless steel is more corrosion-resistant than 304, increasing the price. Tray Size: Widths range from 50mm to 900mm, with larger trays costing more. Fireproofing Method: Trays with intumescent pads, fireproof pillows, or reinforced coatings are more expensive than standard stainless steel trays.

Length and Gauge: Standard lengths are 3 meters, with heavier gauge wire or thicker panels increasing cost. Supplier and Quantity: Bulk orders or trade pricing may reduce per-unit cost, while custom sizes or special cut lengths may increase it.

Typical Price Range

Small to medium trays (100–300mm width, 3m length): £50–£120 per section. Large or heavy-duty trays with fireproofing (450–900mm width, 3m length): £150–£200+ per section.

Purchasing Guidance

Direct suppliers like Direct Channel, CEF, and Cable Joints provide standard stainless steel trays and can advise on fireproof options. Fireproof-specific products may require contacting suppliers for a custom quote, especially for intumescent or reinforced fireproof trays. Delivery and lead times vary; most UK suppliers dispatch standard trays within 1–2 working days, but fireproof or custom trays may take longer.

For accurate pricing, it is recommended to contact suppliers directly with your required tray dimensions, stainless steel grade, and fireproofing specifications. This ensures you receive a quote tailored to your project needs.
