

Price of outdoor protection for distribution boxes

Overview

☐Waterproof and Secure☐: With an IP65 rating, our Distribution Protection Box effectively safeguards against water and dust, ensuring the safety of your electrical circuit breakers.

Key Takeaways

Outdoor distribution boxes with IP65 protection typically range from \$30 to several hundred dollars depending on size, material, and features.

Typical Price Range

For standard residential or small commercial outdoor distribution boxes, prices generally start around \$30-\$50 for basic ABS plastic enclosures with IP65 waterproofing, such as a 12-way DIN rail box measuring 255 x 200 x 110 mm. Larger or more durable boxes made from flame-retardant ABS/PC, aluminum, or stainless steel can cost \$100-\$300 or more, especially if they include additional features like circuit breakers, grounding systems, or smart monitoring capabilities.

Factors Affecting Cost

Material: ABS plastic is common and cost-effective, while aluminum or stainless steel offers higher durability and corrosion resistance, increasing the price. **Size and Capacity:** Boxes with more circuits or larger internal space for equipment are more expensive.

I

P Rating: IP65-rated boxes provide dust and water protection; higher ratings or specialized sealing can raise costs. **Customization:** Options like specific mounting configurations, multi-socket fittings, or integrated monitoring systems can significantly increase the price. **Installation and Accessories:** Additional costs may include cable glands, gaskets, or professional installation, which are often necessary for outdoor setups.

Practical Considerations

Ensure the box is weatherproof with proper sealing and drainage to prevent water accumulation. Choose materials suitable for UV exposure and corrosion resistance if installed in harsh outdoor environments. Consider future expansion; modular designs allow adding circuits without replacing the entire box.

For industrial or commercial applications, boxes with enhanced safety features and compliance with CE or RoHS standards are recommended. In summary, basic outdoor distribution boxes start around \$30-\$50, while more robust, larger, or customized units can exceed \$300, with the final cost influenced by material, size, IP rating, and additional features.
